

Mattamy Homes was founded in 1978, and to date, we have built over 30,000 homes in communities in many cities across the GTA including Mississauga, Brampton, Cambridge, Milton, Burlington, Oakville, Stouffville and Scarborough. As the largest new home builder in Canada, we believe we must act responsibly to protect the balance of essential resources we need to thrive on this planet.

We have always, as a company, believed in innovation – finding new solutions and looking at old problems in new ways – to build homes that satisfy human needs. Our wildly successful High Park community in Mississauga is a unique example of this innovation, with the introduction of our 3 storey ‘Urban Walk-Up’ product.

We now turn an innovative eye towards creating homes that also satisfy environmental needs. One of our largest communities now offers homes that meet the standards of Energy Star. As a result, we now sell more Energy Star homes than any other Canadian builder. This community represents our desire to take a balanced approach to addressing the needs of the individual and the broader community, while enhancing the reciprocal benefits that are possible in a healthy relationship with nature.

Mattamy Homes continues to strive to make dreams of a better world a reality.
